- Agile Project Management — Google, Dec 2025
- Foundations of Project Management — Google, Nov 2025

ABOUT

Multidisciplinary professional bridging UX/UI design, project coordination, and team enablement. I design interfaces in Figma, build Kanban pipelines in Notion, tailor developer profiles for B2B client pitches, and coach senior tech staff in Business English. Also Product Owner & Art Director for an indie game.

EXPERIENCE

Team Coordinator

Azati Software · Full-time

Feb 2026 – Present | Hrodna, Belarus (On-site)

Resource Management & Pre-Sales Support

- Tailored and prepared developer CVs/profiles to client and sales requirements; guided developers through submission across the Developer → Sales → Customer pipeline.

Process Coordination & Client Communication

- Acted as primary client-communications liaison, streamlining request routing and on-time deliverables.
- Built consolidated resource dashboards; managed logistics, credentials, office layouts; maintained org charts in Confluence.

Team Enablement & Corporate Education (L&D)

- Created a Business English framework from scratch (guidelines + Speaking Clubs); ran 24+ assessments with structured feedback.
- Delivered intensive 1-on-1 coaching for senior technical staff.

UX/UI & Design Operations

- Managed end-to-end design and production of corporate merchandise and office branding (Figma → outsourced print).

English Language Tutor

Self-employed · Freelance

Jul 2025 – Feb 2026 | Remote

- Delivered tailored 1-on-1 online lessons for up to 9 active students simultaneously.
- Developed customized lesson plans for General, Conversational, and Technical English.
- Guided an IT professional to overcome language barriers and build confidence for English-speaking workplaces.

Technical Secretary

Yanka Kupala State University of Grodno · Contract

Jun 2025 – Aug 2025 | Hrodna, Belarus (On-site)

- Coordinated a team of 6 and streamlined daily tasks by introducing Google Workspace tools.
- Verified applications via admin panel; built and maintained master data spreadsheets and timesheets.
- Served as primary point of contact for external partners in English and Russian.

PROJECTS

Kadence — Narrative 2D Simulation Game

Role: Product Owner · Lead UX/UI Designer · Art Director

Jun 2026 – Present | Indie Game Project

A narrative-driven 2D simulation blending e-commerce inventory management with visual-novel mechanics. As creator and Product Owner, I lead a cross-functional indie team of 3 building a playable vertical-slice demo.

Product Management

- Established the full development pipeline from scratch (Agile/Kanban in Notion); authored the GDD covering core loops, item databases, and economy balancing.

UX/UI Architecture

- Designed end-to-end Figma interfaces — B2B e-commerce dashboard, bike-assembly screens, dialogue systems — focused on intuitive navigation and low cognitive load.

Art Direction & 2D Illustration

- Defined a cohesive “cozy” brand identity; hand-drew 100% of assets in Krita (environments, sprites, UI components).

Cross-functional Collaboration

- Prepared developer handoffs, translating UI and game mechanics into clear logic for Unity implementation.

Tools: Figma, Krita, Notion, GitHub, Google Workspace, Gemini, Claude, Grok
